THE GAME
IS ALWAYS ON WITH
THE RIGHT NUTRITION.

Goodness of Vitamins & Minerals, Protein and Omega-3 fatty acids sourced from nature.

"Health fit to everything hit. For my health, it is important to create the right foundation, which I do with the help of a balanced diet, regular exercise and the goodness of Nutrilite's Protein, Vitamins, Minerals and Omega-3 everyday of my life. I take Nutrilite All Plant Protein powder. Protein helps me be strong and active. Nutrilite Daily provides 13 vitamins and 11 minerals which support me with the nutrition to go through the rigours of the day. Through my acting, writing, singing and direction, I step into your hearts and for supporting my own healthy heart I get Omega-3 fatty acids from Nutrilite Salmon Omega-3 everyday."

Nutrilite products are under Nutraceutical/Health supplement categories of FSSAI. These products are not for medicinal use. Not to exceed recommended daily usage. These products are not to be used as a substitute for varied diet. Products are required to be stored out of reach of children. Children (refer individual product pack for age group), pregnant or lactating women or anyone with a medical condition should consult with physician before using these products.

THE NUTRILITE STORY

When it comes to supplements, Nutrilite® products are different - and that's a good thing. Turn to this section for help explaining the value of supplements, phytonutrients, and our brand.

1. Why Supplements?

2. Why Phytonutrients?

3. Why Nutrilite?

THIS SECTION ANSWERS THREE KEY QUESTIONS

Why Supplements?

Use this section to understand the role supplements play in optimal wellness:

- Common nutrient gaps
- How supplements help fill the gap

Why Phytonutrients?

Use this section to learn all about phytonutrients:

- What they are
- How they work
- Great food sources
- What to supplement

Why Nutrilite?

Use this section to learn how to tell the Nutrilite story:

- Quality from seed to supplement
- How we use the best of nature
- How we enhance our plant-based ingredients with the best of science

THE NUTRILITE STORY

Nutriline® supplements are different. Nutriline® is the global vitamin and mineral brand to grow, harvest, and process plants on their own certified organic farms. Nutriline® is dedicated to provide high-quality products. Many Nutriline® supplements are certified by NSF International, a leading third-party independent test lab. We even have a customer satisfaction guarantee* to back that up. When you take Nutriline® supplements, you're getting more than vitamins and minerals – you're also getting phytonutrients, the beneficial plant compounds that you may not be getting enough of if you don't eat the recommended servings of fruits and vegetables daily. Use Nutriline® products and you'll see the difference.

*Exclusions apply. For complete details, visit www.amway.in

1. WHY SUPPLEMENTS?

SUPPLEMENTS HELP FILL NUTRIENT GAPS

8 out of 10 people aren't eating enough fruits and vegetables,* which means most people have a nutrient gap between what they eat and what they need.*

The American Medical Association and the U.S. Food and Drug Administration both support using supplements to fill this gap.

You should take supplements if any of the following is true for you:

- You don't eat 5-9 servings of fruits and vegetables every day
- You eat 5-9 servings but don't get a wide variety
- You often don't have time to make healthy meals
- You often choose convenient, processed foods over healthier options

*[cdc.gov/mmwr/preview/mmwrhtml/mm6426a1.html](https://www.cdc.gov/mmwr/preview/mmwrhtml/mm6426a1.html)

8 out of 10 people aren't getting the recommended 5-9 servings of fruits every day.

Images shown are for representation purpose only.

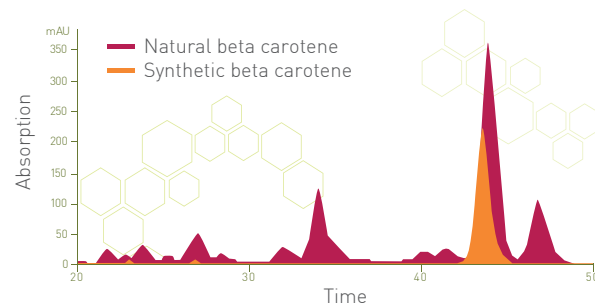

2. WHY PHYTONUTRIENTS?

PHYTONUTRIENTS ACT AS POWERFUL ANTIOXIDANTS

Plants produce phytonutrients (or “plant nutrients”) as a defense mechanism to protect themselves from the environment. Phytonutrients are thought to provide similar benefits to people.

The next time you walk down a produce aisle, pay attention to all of the different colors. Each vibrant plant color is tied to the phytonutrients it contains – and a specific range of health benefits. In order to get many protective benefits for your whole body, it’s important to eat a wide variety of different colors of food.

THE VALUE OF PLANT-BASED INGREDIENTS

At Nutrilite, we use phytonutrient mapping to measure and compare the phytonutrient content of plant-based and synthetic concentrates. Each peak on the chart represents a nutrient.

As you can see, natural beta carotene (from algae) contains far more nutrients than its synthetic counterpart.

POWER UP YOUR PLATE
Want to add a particular phytonutrient to your diet? Some fruits and vegetables contain more than others.

RED GRAPES
are a good source of resveratrol. Resveratrol is believed to support memory and heart health.

CARROTS
are a good source of alpha carotene. Alpha carotene can support healthy vision.

RASPBERRIES
are a good source of ellagic acid. Ellagic acid can support cellular-health.

GREEN TEA
is a good source of EGCG.* EGCG can support brain and heart health.

RAW GARLIC
is a good source of allicin. Allicin can support already healthy blood pressure.
*Epigallocatechin Gallate.

DID YOU KNOW?
Nutrilite® products are rich in vitamins, minerals and phytonutrients

2. WHY PHYTONUTRIENTS?

5 COLORS A DAY IS THE OPTIMAL WAY

Eating phytonutrient-rich

fruits and veggies of

every color provides

specific health benefits

to cover you from

head to toe.

SUPPORT BRAIN HEALTH

KEY PHYTONUTRIENTS

Purple fruits and vegetables contain the phytonutrients quercetin, resveratrol, ellagic acid, and many different types of anthocyanidins and procyanidins

WHAT TO EAT

Grapes, blueberries, boysenberries, eggplant, purple sweet potatoes, plums, beets, and blackberries, etc.

SUPPORT VISION HEALTH

KEY PHYTONUTRIENTS

Orange and yellow fruits and vegetables contain the phytonutrients beta carotene, alpha carotene, beta-cryptoxanthin, lutein, zeaxanthin, quercetin, and hesperidin

WHAT TO EAT

Pineapple, lemons, passion fruit, oranges, cantaloupe, carrots, apricots, sweet potatoes, tangerines, squash, papaya, and corn, etc.

SUPPLEMENTS THAT SUPPORT VISION HEALTH

- Nutrilite® Multi Carotene
- Nutrilite® Bilberry with Lutein

SUPPORT HEART HEALTH

KEY PHYTONUTRIENTS

Red fruits and vegetables contain the phytonutrients lycopene, anthocyanidins, proanthocyanidins, beta carotene, and ellagic acid

WHAT TO EAT

Apples, cranberries, watermelon, pink grapefruit, guava, pomegranate, radishes, raspberries, strawberries, cherries, and tomatoes, etc.

SUPPLEMENTS THAT SUPPORT HEART HEALTH

- Nutrilite® CoQ10
- Nutrilite® Garlic

SUPPORT CELLULAR HEALTH

KEY PHYTONUTRIENTS

Green fruits and vegetables contain the phytonutrients isothiocyanate, lutein, zeaxanthin, isoflavones, and EGCG, plus many more

WHAT TO EAT

Kale, collard greens, spinach, green peppers, watercress, zucchini, broccoli, brussels sprouts, green beans, soybeans, and green tea, etc.

SUPPLEMENTS THAT SUPPORT CELLULAR HEALTH

- Nutrilite® Concentrated Fruits and Vegetables

SUPPORT BONE & JOINT HEALTH

KEY PHYTONUTRIENTS

White fruits and vegetables contain the phytonutrients EGCG, alliin, isothiocyanate, quercetin, and anthocyanidins

WHAT TO EAT

Turnips, onions, mushrooms, horseradish, white kidney beans, parsnips, garlic, cauliflower, black-eyed peas, and pears, etc.

SUPPLEMENTS THAT SUPPORT BONE & JOINT HEALTH

- Nutrilite® Cal Mag D Plus
- Nutrilite® Glucosamine HCL with Boswellia

3. WHY NUTRILITE?

Nutriline® is the global vitamin and mineral brand to **grow**, harvest, and process plants on **their own certified organic farms**.

TROUT LAKE FARM

Washington State, USA

Here we work to improve existing Nutrilite® products, identify nutrients and key ingredients for new products, and refine our organic farming practices.

QUALITY YOU CAN TRUST

From the seed that goes into the ground and the soil it grows in, to the finished product, every Nutrilite® supplement has a story – and we write every chapter.

It starts on organic farms, where we harvest plants at their peak.

It continues in our labs, where Nutrilite scientists are constantly innovating new ways to elevate our plant ingredients for Nutrilite® products.

It ends with multiple quality checks for safety, purity, and identity before the supplements are bottled and shipped. In fact, many of our supplements are tested and certified by NSF International, a leading third-party independent test lab.

In other words, we control the process from beginning to end. So when you think "Nutrilite," think "high quality from seed to supplement." Because every Nutrilite® supplement story begins and ends with us – and continues with you.

OUR GUARANTEE

We take pride in the purity and the quality of our supplements. We stand behind our products with a 30-day return policy.*

*Exclusions apply. For complete details, visit www.amway.in

WHY NUTRILITE? QUALITY YOU CAN TRUST

3. WHY NUTRILITE?

WE CONTROL EVERY STEP FROM SEED TO SUPPLEMENT

1 SEED

It starts with specially selected seeds planted in the right soil and at the right depth.

2 ORGANIC FARMS

We follow organic, sustainable farming practices, allowing our plants to create more phytonutrients.

3 HARVEST

We harvest and process plants at their peak, using whichever parts (seeds, skin, or even the whole plant) have the best phytonutrient profile.

4 SUPPLEMENT

Every supplement undergoes numerous quality checks to ensure its safety, purity, and identity before it's bottled and shipped.

5 FORMULATE

Our scientists are constantly innovating new ways to elevate our natural ingredients by combining essential vitamins and minerals with plant-based phytonutrients.

WHY NUTRILITE?
SEED TO SUPPLEMENT

3. WHY NUTRILITE?

THE BEST OF NATURE

The best phytonutrients come from organic farms. So that's what we use.

Sure, organic farming is more expensive than the conventional farming, but it's worth it. Here's why:

Alfalfa field at **RANCHO EL PETACAL**
Nutrilite® certified Organic Farm

Plants produce phytonutrients as a defense mechanism to protect themselves against pests and diseases. When crops are sprayed with herbicides and synthetic pesticides, as they are on conventional farms, the plants don't have to work as hard to defend themselves. The end result: fewer phytonutrients, and a less-nutritious product.

By growing crops on certified organic farms, we help ensure that the plant-based ingredients used in Nutrilite® supplements contain optimal phytonutrient levels. It's good for our products, good for the earth, and good for the people that work for us.

We own certified organic farmland in Washington State, Mexico, and Brazil.

YOU COULD SAY PHYTONUTRIENTS ARE OUR SPECIALTY

- Our founder, Carl Rehnberg, helped pioneer sophisticated techniques to analyze the nutritional value of specific plants in the 1930s
- Nutrilite scientists have been growing, harvesting, and processing plant nutrients ever since, so they know how to deliver extracts that contain high phytonutrient levels
- We harvest plants at their peak and when possible use whole plants, including seeds and skin, to obtain maximum nutrient levels

WHAT EXACTLY DOES "ORGANIC FARMING" MEAN?

For Nutrilite, organic farming is something we've believed in from the very beginning – long before organic farming was popular. We:

- Prohibit the use of synthetic fertilizers, toxic chemicals, and pesticides
- Use natural methods to control harmful weeds, insects, and predators
- Practice sustainable farming methods that include crop rotation, intercropping, composting, earthworms, and water management
- Create our own organic compost to put nutrients back in the soil
- Prevent topsoil erosion and improve soil fertility and water quality by utilizing holistic agricultural techniques
- Protect the environment and its habitats, promote species diversity, and a sustainable future for our planet

WHY NUTRILITE? SEED TO SUPPLEMENT

WE USE NATURE TO CONTROL NATURE

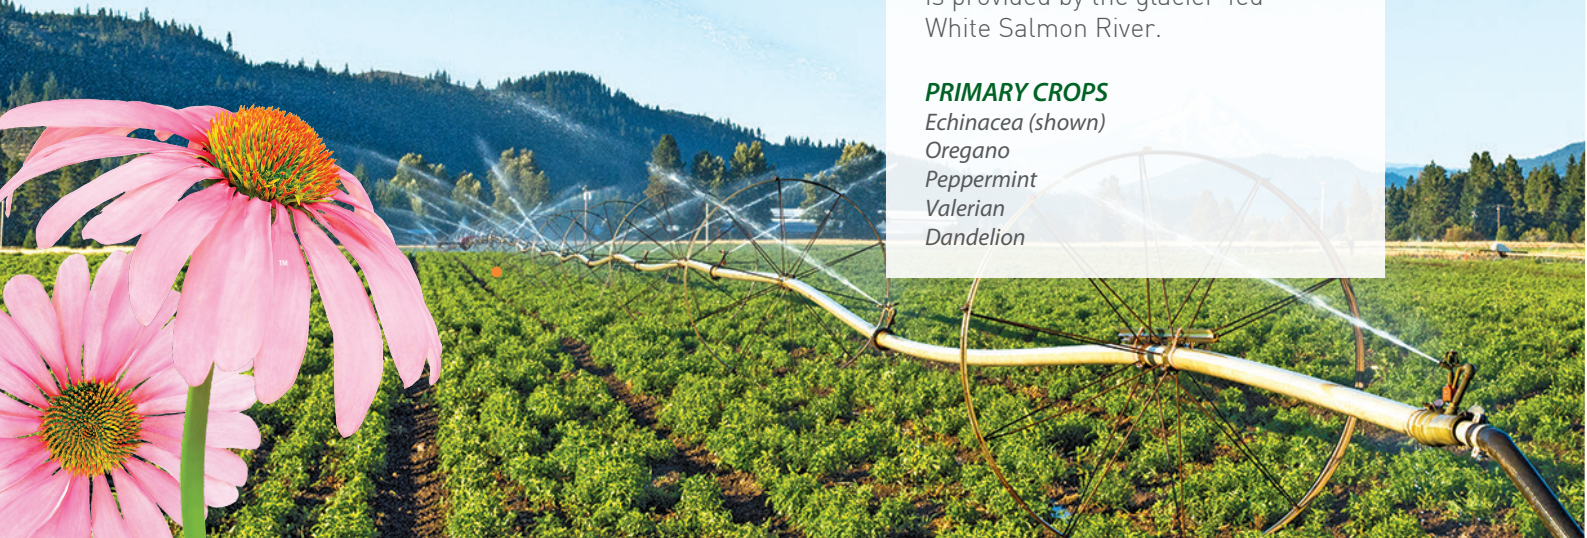

Meet Copper, one of the many falcons used for natural pest control on Trout Lake Farm. Copper is three years old, and his job is to scare away smaller birds that pose a threat to our crops. He's gentle and easy to work with, but terrifying to pest birds. But don't worry: Copper doesn't hurt them. He loves his job and is always eager to get started – but when it's time for dinner, he returns to his handler.

When it comes to smaller pests, we don't use toxic chemicals. Instead, we use ladybugs and green lacewings, among others, to control the harmful insects that would otherwise attack our crops.

3. WHY NUTRILITE?

WE OWN 6,300 ACRES OF ORGANIC FARMLAND

TROUT LAKE FARM

Washington State, USA

At 700 acres, this beautiful landscape is the **largest certified organic farm in North America** – it produces more than 3 million pounds of herbs each year. It’s nestled in the foothills of the Cascade Mountains – which help keep out pollution – and irrigation is provided by the glacier-fed White Salmon River.

PRIMARY CROPS

Echinacea (shown)
Oregano
Peppermint
Valerian
Dandelion

FAZENDA NUTRIORGANICA

This once desolated tract of land – located in Brazil’s Caatinga Desert – is now a beacon of organic farmland. The climate here is perfect for growing acerola cherries year-round. Acerola cherries provide 100% of the natural ascorbic acid (vitamin C) used in Nutrilite® products. At 4,100 acres, this is the largest Nutrilite farm and the **largest acerola cherry farm in the world**.

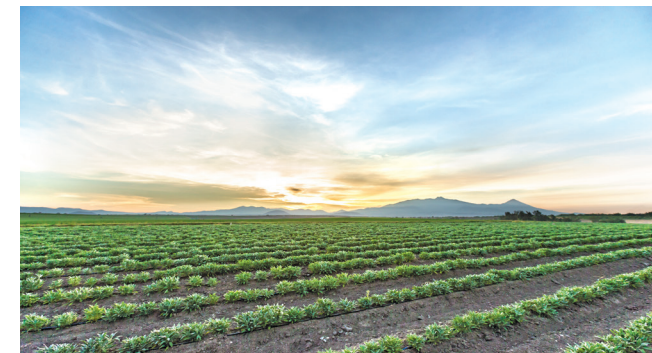

PRIMARY CROPS

Acerola Cherry (shown)
Watercress
Picao Preto

WHY NUTRILITE? OUR ORGANIC FARMS

PRIMARY CROPS

Alfalfa (shown)
Broccoli
Spinach
Kale
Watercress
Parsley
Citrus Fruits

PARTNERS IN SUSTAINABILITY

When we can’t grow certain plants on our farms, we turn to other suppliers. Our NutriCert™ certification program ensures these suppliers are guided by organic, sustainable principles that are consistent with our own.

3. WHY NUTRILITE?

THE BEST OF SCIENCE

Science plays a major role throughout the entire seed-to-supplement story. From the way we plant seeds, to how crops are harvested and processed, we're employing advanced scientific methods at every step of the way.

PLANTING

Our tractors are guided by GPS – they know where to drive to minimize the need for hand weeding, and they know exactly how deep to plant seeds to make sure they're safe from predators (including birds).

"We go after the best, natural ingredients. To do that we need to understand the science behind that nature."

– Dr. Sam Rehnberg
President, Nutrilite Health Institute

PROCESSING

Plants are dehydrated and processed within hours of harvest, using special methods and state-of-the-art equipments.

RESEARCH

A team of over 150 Nutrilite scientists is constantly innovating, searching for new concentrates and better formulations. We have over 190 granted and pending patents worldwide.

MANUFACTURING

We use "soft" blending methods to ensure the potency of our finished product. We thoroughly blend ingredients without damaging the plant concentrates or exposing them to high heat, and our tablet compress uses 1–8 tons of pressure to make-up to 7,000 tablets per minute.

QUALITY CONTROL

Quality-assurance experts ensure each supplement meets precise specifications for safety, purity, and identity. They conduct over 500,000 checks every year – that's one quality check per minute, every day!

WHY NUTRILITE? THE BEST OF SCIENCE

SCIENTIFIC ADVISORY BOARD

Comprised of leading scientists in the fields of nutrition, health, and genetics from around the world, this board lends their expertise to Nutrilite and helps guide our research and development.

CENTER FOR OPTIMAL HEALTH

This 30,000-sq. ft. world-renowned facility is home to our Research & Development Center, our Quality Assurance building, and more.

It's located in Buena Park, California, and you can visit it anytime it's open.

Visit the Center for Optimal Health to experience our story firsthand.

Similar to the International standards, Amway India follows the same practices too.

NUTRILITE IN A NEW PACKAGING

HOW TO READ THE NEW LABEL

WHO AM I?

Our brand name stands out on the top of each bottle.

HOW MUCH DO YOU TAKE?

Easy dosage instructions.

WHAT ARE MY KEY INGREDIENTS?

Graphics of ingredients complemented by hexagon graphic to represent science.

WHY AM I RIGHT FOR YOU?

Key product claim makes it easier to sell.

YOUR EVERYDAY SUPPLEMENT REGIME

Everyone has the same basic nutrient needs, and this section includes a detailed look at those needs along with supplements that can help fill in the gaps.

This section will help you speak about the science behind basic nutrients and recommend everyday products to customers.

UNDERSTANDING EVERYDAY SUPPLEMENT REGIME

Everyday supplements aren't just a great way to fill the nutrient gap most people have – they also help introduce customers to the Nutrilite® brand. Think of it this way: no matter where you're from or what your age is, everyone has the same basic nutrient needs. Unfortunately, 80% of people aren't getting the fruits and veggies they need from diet alone. That means just about everyone could benefit from everyday supplement regime of PDO.

These nutrients can be split into three categories: macronutrients, micronutrients and phytonutrients.

MACRONUTRIENTS
Protein, fat and carbohydrates.

Many supplement brands focus on macronutrient and micronutrient supplements. The Nutrilite® brand offers all three.

MICRONUTRIENTS
Vitamins and minerals.

PHYTONUTRIENTS
Organic components found in fruits and vegetables.

BUILDING A SOLID FOUNDATION

Think of your body as a house – macronutrients, micronutrients, and phytonutrients are all essential building blocks.

BRICKS – protein helps us grow and repair ourselves.

MORTAR – vitamins and minerals create a strong foundation by performing hundreds of roles in the body to help sustain life.

SECURITY – phytonutrients help protect the integrity of the bricks and mortar.

ELECTRICITY – omega-3 fatty acids help support the health of our nervous and cardiovascular systems.

GOODNESS OF NATURE & PROTEIN

Proteins are vital to any living organism. Proteins are an important constituent of tissues and cells of the body. They form an important component of muscles and other tissues.

They provide essential amino acids which are important for metabolism, growth & development.

Protein is required for people from all lifestyle and life stages. Growing children, for example, need protein for growth & development. Adults use protein to build, repair & maintain tissues, and to support bones, skin & hair. And the elderly require protein to support muscle tone, bone mass and strength.

Our body constantly uses up protein and does not store it, and therefore it needs to be replenished every day. As per ICMR, a healthy adult needs approx. 1g protein/kg of body weight every day. So, an adult of 60 kg would need approx. 60 g of protein every day.

Due to hectic lifestyle and poor eating habits, many of us may be lacking the required protein in our everyday diet. Nutrilite All Plant Protein powder along with regular diet can help in filling the protein gap in everyday diet. It provides you the goodness of nature and its tri-blend of soy, wheat & yellow pea give you benefits like 80% protein per serving that are 100% plant sourced. It provides all 9 essential amino acids as per the proposed guideline of WHO/FAO/UNU.

Nutrilite All Plant Protein powder is neutral in taste and therefore can be easily added to a glass of water, milk, variety of shakes, juices, butter milk, curd, soups, atta (flour), breads, cakes, biscuits or any other food or beverages.

NUTRILITE® all plant protein powder

FEATURES & BENEFITS

- 100% plant protein sourced from tri-blend of Soy, Wheat & Yellow Pea
- Supplies 9 essential amino acids which cannot be produced in the body and must be obtained from outside
- High protein content- one serving provides 8 g of protein per 10 g serving
- No added sugar, lactose free
- Quality protein with PDCAAS =1.0*
- Easy to digest

*Protein Digestibility Corrected Amino Acid Score (PDCAAS) is a global standard established by the WHO with a score of 1.0 representing the highest score possible for a quality protein source.

NUTRITIONAL INFORMATION

Serving Size: 1 Provided Scoop (10 g approx.)
Serving per Container: approx. 100

	Approximate composition per serving (10 g)	% RDA (for adults)	% RDA (for children)
Energy	40 kcal	2.11%	2.96%
Protein	8 g	14.55%	39.80%
Carbohydrates	0.3 g		
Fat Content	0.5 g	2.5%	2%

Essential Amino Acids:
Isoleucine (390 mg), Leucine (660 mg), Lysine (510 mg), Methionine (& Cysteine) (220 mg), Phenylalanine (& Tyrosine) (750 mg), Threonine (310 mg), Tryptophan (120 mg), Valine (400 mg), Histidine (210 mg)

POTENTIAL USERS

- Anyone who-
- Wants to fill the protein gap along with regular diet
 - Wants a blend of 9 essential amino acids
 - Is facing challenges to fulfill protein requirement
 - Requires additional supplementation of protein

STORAGE

- Close container tightly to protect from moisture
- Store in a cool, dry place (below 25° C)

SUGGESTED USE

- For age group 12 years and above, 1 provided scoop (approx. 10 g) of protein powder up to three times daily. For children between 5-12 years, 1 scoop (approx. 10 g) of protein powder daily

Net Content: Available in 1 kg, 500 g, 200 g

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. PRODUCT TO BE STORED OUT OF REACH OF CHILDREN. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

GOODNESS OF PROTEIN AND GREEN TEA

Protein is the basic building block of our body. Protein is needed to produce body tissues and maintain a healthy body. There are 9 essential amino acids that our body cannot synthesis and we have to get them from foods that contain these amino acids. Green tea is an antioxidant & helps protect cell damage from oxidation. Green tea is a source of Catechin, which is a naturally occurring phytonutrient present in green tea leaves. Nutralite protein with green tea is a green tea protein drink. It contains three forms of green tea:

- Green tea extracts
- Instant green tea
- Whole green tea leaves

POTENTIAL USERS

- Adults who enjoy the great taste & flavour of green tea
- Adults who want to take advantage of the antioxidant benefits of green tea along with protein

NUTRILITE®

protein with
green tea

FEATURES & BENEFITS

- Green tea protein drink
- Delicious & refreshing taste of green tea
- Contains three forms of green tea for the perfect aroma & colour
- Contains Catechin - naturally occurring phytonutrient present in green tea
- One serving (23.5 g) contains 8 g of protein, 250 mg of calcium and 1.42 g of whole green tea leaves & green tea extracts
- Contains no artificial colours, flavours or added preservatives

SUGGESTED USE

- Add 1.5 scoopful (23.5 g approx.) in a glass (200 ml) of water/milk/juice. Stir or shake well for a smooth blend. Sweeteners may be added, if desired
- Body does not store excess protein, daily intake is necessary to support everyday requirement of healthy individual. Green tea has antioxidant property

Net Content: 500 g

NUTRITIONAL INFORMATION

Serving Size : 1.5 provided scoops (23.5 g approx.)
Serving per container: approx. 21

	% RDA per serving
Energy	4.68%
Protein	14.54%
Fat	10%
Calcium	41.67%
Green Tea	

Provides the following Essential Amino Acid:
Isoleucine, Leucine, Lysine, Methionine (& Cysteine), Phenylalanine (& Tyrosine), Threonine, Tryptophan, Valine and Histidine

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. PRODUCT TO BE STORED OUT OF REACH OF CHILDREN. CONTAINS NO ARTIFICIAL COLOURS, FLAVOURS OR PRESERVATIVES. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

GOOD NUTRITION IS A DAILY THING

Fast paced living, changing lifestyles, eating habits can have some unexpected results. We eat too many processed foods. We miss meals. Some of us smoke and/or drink alcohol. All of these factors can rob us of the nutrients we need to meet our daily nutritional requirements. Nutrilite Daily helps you meet your daily requirements of nutrition along with a regular diet.

Nutrilite Daily, a multivitamin and multimineral tablet, provides 13 essential vitamins & 11 essential minerals with additional advantages of natural plant concentrates like, the organically grown acerola cherry, parsley, spinach, watercress, alfalfa and carrot. Nutrilite Daily is a convenient way to support your nutritional needs along with a regular diet.

FEATURES & BENEFITS

- Supplies 13 essential vitamins and 11 essential minerals which provide nutritional support
- Provides additional benefit of phytonutrients like beta carotene
- No artificial colours, flavours, or preservatives added

POTENTIAL USERS

Anyone who -

- Wants to support vitamin and mineral intake along with a regular diet
- Has additional nutritional needs related to lifestyle or life-stage such as sports persons, busy adults and the elderly
- Chooses highly processed foods, smokes, drinks alcohol, has a busy lifestyle

NUTRILITE®

SUGGESTED USE

- Take one tablet daily with a meal

GOOD FOR
HEART,
GOOD FOR
HEALTH*

Fast paced lifestyle has changed our eating habits. We end up consuming lots of processed/junk food which is high in fats especially Omega-6 fatty acids. It creates an imbalance between Omega-6 fatty acids & Omega-3 fatty acids. To balance the same, we need to consume optimal amounts of Omega-3 fatty acids. These Omega-3 fatty acids also referred as the "good fats" must be obtained from diet because the body cannot synthesize them on its own.

In addition to regular diet and exercise, give your heart an advantage with Omega-3 fatty acids.

Nutrilite Salmon Omega-3 combines Omega-3 sourced from Salmon raised in the cold, pure waters of Norway and blend of three additional Omega-3 sources - anchovy, mackerel & sardine. Each softgel contains Eicosapentaenoic Acid (EPA) & Docosahexaenoic Acid (DHA) - the desirable forms of the Omega-3 family.

POTENTIAL USERS

- People who consume less of Omega-3 fatty acids in their diet
- Office executives on junk diets, middle age, old-age persons

SUGGESTED USE

- Take one to three softgels daily with meals

NUTRILITE®
salmon omega-3

* Omega-3 fatty acids

FEATURES & BENEFITS

- Each softgel provides 180 mg of Eicosapentaenoic Acid (EPA) and 120 mg of Docosahexaenoic Acid (DHA). Omega-3 fatty acids help support normal heart health and normal triglyceride levels
- EPA and DHA may be beneficial to maintain normal physiological function of heart
- Omega-3 fatty acids in Nutrilite Salmon Omega-3 are derived from Salmon and a proprietary blend of three additional Omega-3 sources anchovy, mackerel and sardine
- Contains no artificial colours, flavours or preservatives

EXPERIENCE THE
**GOODNESS &
 CONVENIENCE**
 LIKE NEVER BEFORE

This bundle pack enables you to try out the goodness of **Nutriline All Plant Protein powder, Daily & Salmon Omega - 3** at just ₹ 3,000 (MRP inclusive of all taxes). Moreover, these products are packed in either sachets or smaller bottles to enhance your convenience in carrying and consuming them.

NUTRILITE All Plant Protein powder provides you the goodness of nature and protein from its tri-blend – Soy, Wheat & Yellow Pea. It is 100% plant sourced protein. Supplies 9 essential amino acids which can't be produced in the body and must be obtained from outside. This high quality protein is easy to digest and has a PDCAAS = 1.0*

NUTRILITE®
 30 serve PDO pack

NUTRILITE Daily is a multivitamin and multiminerals tablet, provides 13 vitamins & 11 minerals with additional advantage of Nutrilite concentrates like the organically grown acerola cherry, parsley, spinach, watercress, alfalfa and carrot. Nutrilite Daily offers a convenient once-per-day choice to help support the need of general well-being along with regular diet and exercise.

NUTRILITE Salmon Omega-3 contains a unique blend of Omega-3 oils sourced from Salmon raised in the cold, pure waters of Norway and a proprietary blend of 3 additional Omega-3 sources – anchovy, mackerel, sardines from the Atlantic and Pacific oceans.

*Protein Digestibility Corrected Amino Acid Score (PDCAAS) is a global standard established by the WHO with a score of 1.0 representing the highest possible score for quality.

Net Contents: All Plant Protein Powder: 30 N Sachets (10 g) Each, Daily: 30 N Tablets, Salmon Omega-3: 30 N Softgels

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. CONTAINS NO ARTIFICIAL COLOURS, FLAVOURS OR PRESERVATIVES. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

Find Your W.O.W.

A Complete Weight Management Program

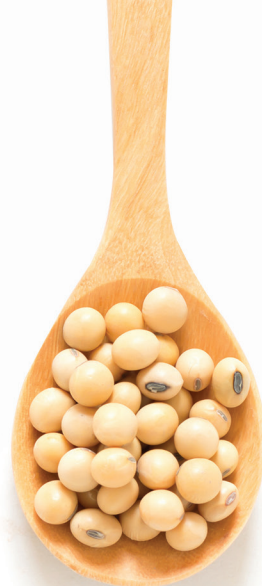

In today's fast paced life, it may be easy to adapt unhealthy behaviours. People may tend to gain weight due to non-nutritious food choices, absence of regular physical activity, lack of sleep, etc. Rise in the number of people who are overweight can be seen as a big problem in India. Weight management is a consistent effort to sustain a good lifestyle over a longer period of time. It is about leading a balanced life which includes a balance of 6 lifestyle keys (Diet, Activity, Stress, Sleep, Meals and Mindset).

Our belief is that no single diet or single work-out works for everyone. Hence, PERSONALIZATION ... is the key.

W.O.W. program is a collaboration of key elements: NHI assessment tool, scientifically formulated products and comprehensive services, all designed to work together to help you reach your personal weight management goals. It's personalized and easy.

NUTRILITE[®]
W.O.W. WILL OVER WEIGHT

W.O.W. Unique Features:

- 1 Diet plans by celebrity nutritionist Shubi Husain
- 2 250 diet plans from 21 states of India
- 3 Personalised NHI assessment
- 4 Be a part of W.O.W. Community
- 5 Dedicated W.O.W. microsite
- 6 Yummy and delicious Bodykey shakes

TO SUPPORT YOUR WEIGHT MANAGEMENT REGIME

Available in 2 flavours- Vanilla & Chocolate

Bodykey shake mix contains a combination of protein, dietary fiber, carbohydrates and 21 essential vitamins & minerals. This shake has been developed with exclusive Bodykey taste mapping technology. It contains no added artificial sweeteners, flavours, colours or preservatives.

SUGGESTED USE

- Empty the contents of 1 sachet into a container, add 250 ml of cold skim milk. Shake/stir well

STORAGE

- Store in a cool, dry place (below 25° C) preferably in refrigerator

CONVENIENT BENEFITS* OF

FRUITS & VEGETABLES

Phytonutrients (Phyto = Plants, Nutrient = Nutrition) means nutrition present in plants. These organic components of plants are good for protecting the plants, and have been researched to promote human health too. As per USDA 2005, one should eat at least 9 servings of colourful and variety of fruits and vegetables per day to get the adequate quantity of phytonutrients.

Phytonutrients are studied to have beneficial effect in improving our health by balancing and protecting the cells and normal functions of the body. A wide range of phytonutrients are powerful antioxidants and can also help support a healthy immune system and provide many other health benefits.

The phytonutrients get destroyed easily due to cultivation, harvesting, storing, shipping, processing and cooking, etc. which leads to the loss of phytonutrients in our diet. Nutrilite Concentrated Fruits and Vegetables is a product specifically formulated to relate with a healthy intake of phytonutrients from fruits and vegetables. It is a rich source of a range of important and well researched phytonutrients and other Nutrilite plant extracts, all of which have important health benefits. Nutrilite Concentrated Fruits and Vegetables provides a convenient way to supplement the diet with healthy phytonutrients in concentrated form along with the balanced diet.

NUTRILITE® concentrated fruits and vegetables

NUTRITIONAL INFORMATION

Rosemary Extract, Elderberry Powder, Acerola, Blueberry Powder, Spinach Powder, Broccoli Powder, Carrot Powder		

SUGGESTED USE

- 2 tablets daily, preferably with a meal
- Can be taken by anyone above 12 years of age
- Pregnant or lactating women or anyone with a medical condition should consult a physician before consuming this product

*Made from whole food extracts, just two tablets provide these select phytonutrients: lycopene of 2/3 tomato, elagic acid of 1 servings of raspberries, lutein of 1 1/3 servings of spinach, EGCG of 1 2/3 servings of green tea, hesperidin of 2 oranges, and quercetin of 3 1/3 apples, plus the added benefits of the exclusive Nutrilite Phytonutrient Concentrate.

Net Content: 60 N (Tablets)

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

FEATURES

1. Phytonutrient Lycopene

Lutein Quercetin

Elagic Acid

Hesperidin

EGCG

2. A daily serving of Nutrilite Concentrated Fruits and Vegetables provides a broad range of phytonutrients, naturally found in equivalent to 10 servings of fruits and vegetables
3. Nutrilite Concentrated Fruits and Vegetables along with Nutrilite Daily is a good combination to get the broad range of vitamins, minerals and phytonutrients

POTENTIAL USERS

- Those who want to supplement their diet pattern along with balanced diet
- Who are health conscious
- Who understand the benefit of natural products. No artificial colour, flavours or added preservatives

BENEFITS

Protective benefit in men's health

- Healthy prostate
- Good for heart and lung health

Promotes eye health

Supports blood vessels, heart health and vitamin C function

Protects DNA, promotes colon health

Supports circulatory system

Good for cardiovascular system

SUPPORTS NORMAL DIGESTIVE FUNCTION*

Fiber is an important component of a diet. Fiber helps support normal digestive function already in healthy range. Recommended daily intake of fiber for an Indian diet is 40 g per day. But due to western influence and urbanisation, the consumption of highly refined food has increased, thereby reducing the intake of dietary fiber.

Nutrilite Fiber is a blend of three natural soluble fibers:

- 1 Resistant maltodextrin
- 2 Partially hydrolysed guar gum
- 3 Inulin

SUGGESTED USE

- Dissolve contents of one scoop (4.5 g) gradually in 250 to 350 ml of water or juice and stir for 30 seconds
- Taking this product without enough liquid may cause choking. It is important to be well hydrated while taking this supplement and is ideal to consume it with a meal
- For adults & children 12 years of age & older, recommended use is one to two scoops daily, gradually increasing fiber intake

NUTRILITE®
fiber

* Already in normal range.

FEATURES & BENEFITS

- Contains 3.7 g of soluble dietary fiber per serving
- Blends easily with water producing a clear, tasteless, low viscosity liquid that helps meet the daily requirements of dietary fiber

POTENTIAL USERS

- Anyone who wants to support their regular diet with fiber

CALCIUM

HELPS BUILD STRONG BONES

The new Nutrilite Cal Mag D Plus is a stronger new formulation which combines 4 essential nutrients, calcium, vitamin D, magnesium and zinc. While the calcium is brought in from one of the most concentrated botanical sources of calcium in the world, vitamin D is critical for calcium absorption from gut to bloodstream in your body. Magnesium supports calcium absorption by regulating calcium levels in your body and zinc supports healthy immune system. Coralline red algae is found in the deep waters off the coast of Iceland. This living resource, rich in natural minerals, thrives in the glacial fjords. Throughout its life cycle, coralline red algae naturally calcify. The rough ocean waters of the fjords break off bits of the calcium-rich structures, then oceanic and freshwater currents carry the broken bits and deposit them in deep Maerl beds under the sea. From these beds, Icelandic mariners harvest the rich calcified remains.

CALCIUM GOES BEYOND YOUR BONES

Not only your bones and teeth need calcium, your body uses it for a lot of different things like critical metabolic functions as cardiovascular function, muscle function, nerve transmission, intracellular signaling and hormone secretion. Calcium is an essential nutrient which needs to be taken as part of a healthy diet.

DID YOU KNOW?

Your bones act as a repository by storing calcium within their structure. If you don't get enough dietary calcium every day, your body will steal it from your bones for essential body functioning, making your bones brittle.

NUTRILITE®

cal mag D plus

Calcium

Sourced from algal *(one of nature's most concentrated botanical sources of calcium)* and widely popular rich source of calcium: calcium carbonate

Recommended daily serving of Nutrilite Cal Mag D Plus provides 66.67% of RDA*

Vitamin D

Double the amount as compared to Nutrilite Alfalfa Calcium Plus

Critical for calcium absorption from gut to bloodstream in your body

Recommended daily serving of Nutrilite Cal Mag D Plus provides 100% of RDA*

Magnesium

Magnesium contributes to the maintenance of normal bones

Recommended daily serving of Nutrilite Cal Mag D Plus provides 43% of RDA*

Zinc

Supports healthy immune system and contributes to the maintenance of normal bones

Recommended daily serving of Nutrilite Cal Mag D Plus provides 100% of RDA*

NUTRILITE Cal Mag D Plus is a combination of calcium, magnesium, vitamin D and zinc.

Build bones while you are still young! If you get plenty of calcium, vitamin D, magnesium and zinc in your early stages of life; these act like investing in inner strength for years to come.

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. PRODUCT TO BE STORED OUT OF REACH OF CHILDREN. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

THREE IRON SOURCES, ONE PRODUCT

Iron is an important nutrient found in the body. As per World Health Organization, iron is one of the top nutrients missing from the diet. Imagine, if your body lacks adequate iron, what do you think would happen? You just won't have enough oxygen at your disposal. Oxygen is a key factor in everything we do. So, without enough oxygen, you won't be able to do your daily work properly.

WHY YOU NEED

IRON

- Iron makes hemoglobin which carries oxygen to every cell of the body
- Tissues require iron for various biochemical reactions

Nutrilite Cherry Iron provides a blend of iron from three sources-ferrous bisglycinate, ferrous fumarate and mustard greens. Folic acid is added for its important benefits to women.

Science has proven that people in different life stages have different iron needs and different iron absorption abilities.

That's why, Nutrilite Cherry Iron is specifically formulated with a blend of three types of iron, research suggests that absorption from ferrous bisglycinate is 2-3 times higher than other forms like ferrous sulphate.

NUTRILITE® cherry iron

FEATURES & BENEFITS

- 15 mg iron from three iron sources (ferrous bisglycinate, ferrous fumarate & mustard greens). Mustard green is one of nature's richest plant source of iron
- Vitamin C helps increase body's iron absorption ability
- Folic acid has additional benefits for women

NUTRITIONAL INFORMATION

Serving Size: 1 N (tablet)

	Approximate composition per serving (1 tablet:0.576 g)	% RDA (for adults)

BEAUTY

FROM THE INSIDE OUT

Beauty starts from the inside. The word beauty has endless descriptions. However, it means a lot to everyone because it gives confidence to you. Be it in your personal or in your professional life, looking beautiful always gives you an edge. That's why it makes sense when you think about it. Remember, you can only look beautiful when you are well nourished from the inside. Three important body parts which adds to one's beauty are hair, skin and nails. They too need right nourishment to look healthy & beautiful.

Beautiful hair is a valued possession. It's one of the first features that someone notices about you. It can express your personality and style without having to say a word. Hair needs right nourishment to be healthy. Many factors like genetics, hormone imbalances, age, pollution or stress can lead to poor hair health. Nutrients like biotin plays important role for hair nutrition. Biotin is important in enzymatic reactions involving the formation of keratin, which is the key structural component of hair.

Skin is an essential component of the human body and has several important roles. For example, it protects the body against the environment, guards against dehydration, allows waste materials to pass through perspiration, and helps maintain body temperature. Skin produces, discards and replaces about one billion skin cells every day. The appearance of the skin can change if one does not nourish the skin with the right skin nourishment at the right time.

Nails are thin, translucent plates covering the dorsal surface at the end of each finger and toe. Nails are considered to be an extension of skin. They are important for protecting and supporting the tissues in your fingers. Short, brittle nails are a common complaint, but there are things you can do to achieve good nails.

Healthy hair, skin and nails are one of the reflection of your overall nutritional status. Adequate rest, exercise, balanced nutritional diet and right food choices may help support the growth and maintenance of hair, skin and nails.

NUTRILITE®

biotin cherry plus

FEATURES

- 1 Biotin
- 2 Collagen
- 3 L-cysteine
- 4 Glycine
- 5 Vitamin C
- 6 Grape seed
- 7 Nutrilite acerola cherry concentrate

BENEFITS

- Research suggests that biotin may help reduce nail brittleness, promote good hair and improve skin condition
- Necessary for structure, and growth of hair, skin and nails
- L-cysteine is an amino acid. This amino acid promotes the formation of keratin, a major protein in hair, skin and nails
- Works in conjunction with collagen to promote skin moisturization
- Helps as a co-factor in the production of collagen in the skin. Also a potent antioxidant
- A powerful antioxidant reported to promote capillary. Also, it may help in the reduction of elastin degradation in the skin
- Provides added benefits of phytonutrients

- Women who are conscious about hair, skin and nails

SUGGESTED USE

- Take one tablet daily with meal

Nutrilite Biotin Cherry Plus contains combination of nutrients which provide nutritional support to help make hair, skin and nails beautiful.

SUPPORTS MENOPAUSE RELIEF

Menopause is the final transition in women's life. It is that phase of her life which marks the end of her reproductive days. Menopause happens because the ovaries stop producing the hormones- estrogen and progesterone. Some people call the years leading up to a woman's last period menopause, but that time actually is the menopausal transition. During the time of the menopausal transition, menstrual cycle can stop for a while and then start again. Therefore, the only way to know if you have gone through menopause is if you have not had your menstrual cycle for one year. It happens as early as 40 years or as late as 55 years. This stage needs special care and attention, not only nutritional but also emotional and psychological. This is due to the fact that a lot of hormonal changes take place in the body which lead to physical and psychological changes.

Some women worry about menopause, and it can cause uncomfortable conditions. But, there are many ways to manage these conditions and stay active and strong.

Menopause affects every woman differently. Some women have minimal conditions, but some women may have a lot of conditions disturbing their everyday life.

Some changes that might start in the years around menopause include:

- Irregular menses
- Hot flushes
- Trouble sleeping
- Mood changes
- Osteoporosis

NUTRILITE®
black cohosh and soy

Menopause is a natural life-stage, which every woman will experience in some way. However it is important how you manage it, healthy lifestyle changes like adequate rest, regular exercise and balanced nutritional diet may help you manage your this life-stage well.

Nutrilit Black Cohosh and Soy contains Black Cohosh and Soy.

Black Cohosh and Soy may support women's overall well-being during menopause. It may help reduce hot flushes, night sweats and mood swings. Ageing gracefully is much easier when these effects are minimized.

SUPPORT IMMUNITY & NEUTRALIZE FREE RADICALS WITH VITAMIN C

No matter how careful you are, your body is subject to free radical damage. Various factors like smoking, exposure to sun and pollution, stress, etc. cannot be avoided. Vitamin C, an antioxidant, supports immune system and helps in neutralizing free radical damage. Body does not make or store vitamin C.

Therefore, it needs to be replenished every day through diet. But our fast paced lifestyle and erratic eating habits make it difficult to ensure a diet that can fulfil the daily recommended quantity of this important nutrient.

Nutrilite Natural C contains isolated vitamin C & acerola cherry concentrates. Acerola cherries, one of the richest known source of vitamin C, are grown in Nutrilite farms. It also contains citrus bioflavonoids. These are naturally associated with vitamin C in citrus fruits. Each tablet of Nutrilite Natural C provides 40 mg of vitamin C along with regular diet help support your daily vitamin C requirement.

NUTRILITE®
natural C

FEATURES & BENEFITS

- Vitamin C supports normal functioning of immune system and helps to neutralize the free radical damage
- With the goodness of acerola cherry, support your daily requirement of vitamin C with Nutrilite Natural C

POTENTIAL USERS

Anyone who:

- Does not eat enough vegetables and fruits, especially citrus fruits and wants to support their diet
- Is interested in providing antioxidant action in the body
- Smokes, consumes alcohol or lives in an area where pollution is high. These are conditions which deplete the body of vitamins
- Inadequate dietary intake

GARLIC GOOD FOR HEART

Nutrilite Garlic contains Allicin, the key component in garlic which helps maintain blood lipid levels already within the normal range.

Nutrilite Garlic is sourced from the mountain-grown garlic and concentrated at low heat (with no additives) to retain more of its benefits. It is known to support normal blood cholesterol and daily intake of garlic is beneficial for healthy individual.

Nutrilite Garlic comes with an "enteric coating" which helps the tablets to move through stomach without getting destroyed and gets absorbed in the intestine thereby, minimizing the odour.

FEATURES

- Each daily serving (2 tablets per day) contains 600 mg of garlic powder that provides 13.5 mg of Allicin and a potential Allicin yield of 6 mg
- Enteric coating ensures that the ingredients are released in the intestine
- Contains peppermint, a natural soothing herb
- Contains no artificial flavours, colours or preservatives

NUTRILITE® garlic

BENEFITS

- May help to support healthy lipid levels already in healthy range
- An enteric coating releases ingredients in the intestines, thus delivering the Allicin and minimize 'Garlic Breath'
- Peppermint helps to mask and minimize the garlic odour

POTENTIAL USERS

Anyone who:

- Wants to supplement his/her diet with Nutrilite Garlic

SUGGESTED USE

- Two tablets once daily, preferably with a meal

STORAGE

- Close the cap tightly after use. Keep the bottle in a cool, dry place

START TO THINK ABOUT CH BALANCE

It is not easy to maintain a proper balance within the various facets of life, be it work, family, health, etc. Most of the times, the resulting imbalance is seen in your nutritional intake.

With modernization, a large proportion of Indians are trading healthy traditional diets for fatty foods, physical jobs for desk bound work and the relative calm of the countryside for the stressful city.

Nutrilite CH Balance made with naturally sourced green tea extract is considered to be beneficial in maintaining cholesterol levels that are already in normal range.

Green tea extract delivers two different phytonutrients in each softgel: Catechins and Theaflavins.

Scientific research suggests that this combination of green tea polyphenols: catechins and theaflavins, works in 2 ways:

1. Scientists believe that the primary action of these green tea polyphenols begins in the intestines. They bind to the cholesterol in the gut and enable it to pass through the body with reduced absorption.
2. Scientists also believe in a secondary mode of action, which begins in the liver. The liver detects the decrease in dietary cholesterol and increases uptake of LDL cholesterol from the blood to make bile.

NUTRILITE® CH balance

FEATURES & BENEFITS

- Each serving provides 395 mg of green tea extract
- No added artificial colours, flavours or preservatives

SUGGESTED USE

- Take 2 softgels daily with a meal

NUTRITIONAL INFORMATION

GOOD JOINTS FOR BETTER TOMORROW

It contains a blend of Glucosamine HCL with Boswellia and Bromelain. It also contains acerola concentrate and citrus bioflavonoids. Glucosamine is the main building block for semi-fluids that lubricate joints. Boswellia and Bromelain supports healthy connective tissues. Glucosamine HCL is used in this formula, it delivers more active glucosamine than the sulphate.

POTENTIAL USERS

- Anyone who is interested in maintaining the health of their joints (which are already in a healthy state) - housewives, business executives, athletes & other persons
- Children under 12 years of age, pregnant women or anyone with a medical condition should consult a doctor before using this product

SUGGESTED USE

- Take two capsules twice daily, preferably with meals

STORAGE

- Keep bottle tightly closed. Store in a cool, dry place

NUTRILITE® glucosamine HCL with boswellia

FEATURES & BENEFITS

- Glucosamine ingredient helps support normal joint functioning and mobility which are already healthy
- Boswellia - a gum resin which supports healthy connective tissues
- Bromelain - a natural enzyme which helps healthy connective tissue
- Provides additional benefit of phytonutrients
- This product along with regular diet and moderate exercise supports normal joint functioning which are already in normal state

SUPPORT ENERGY PRODUCTION IN THE CELLS

The body survives on the energy that is created when cells break down sugars, fats and protein. Much of this breakdown happens within tiny enclosures in the cells called mitochondria. CoQ10 is a required co-factor in the release of energy and to maintain energy levels within cell.

Coenzyme Q10 is a basic component present in every cell in the body (especially abundant in the heart).

Nutrilite Coenzyme Q10 contains coenzyme Q10 which exists in every cell and plays an important role in energy production. Each capsule also contains citrus bioflavonoids which provide phytonutrient benefits. Additionally, a varied diet and a healthy lifestyle are of general importance.

CoQ10 is an essential nutrient and is produced internally by the body. When we are young, our bodies naturally make plenty of coenzyme Q10 that helps create the energy our bodies need. But as we age, our bodies produce less and less of this important enzyme. It can be challenging to obtain CoQ10 from the diet alone as it is available in trace amount in food. The best food sources for CoQ10 are foods typically high in fat such as meats, beef, vegetable oils, etc.

Nutrilite Coenzyme Q10 Citrus Concentrate complex comprises of coenzyme Q10 which supports the energy production in cell. It is an antioxidant and supports healthy heart and every other cell in our body. The coenzyme Q10 used in this product is the best form of CoQ10 which is fast absorbing. Citrus bioflavonoids provide additional benefits of phytonutrients.

NUTRILITE® coenzyme Q10 citrus concentrate

FEATURES

Coenzyme Q10

Citrus Bioflavonoids

BENEFITS

Potent antioxidant and helps to neutralize free radical damage

Helps cells to produce energy they need to support healthy heart function

Provides additional benefits of phytonutrients

POTENTIAL USERS

- Those who want to add CoQ10 to their diet

SUGGESTED USE

- Take 4 capsules daily, preferably with a meal and in divided servings

SUPPORT YOUR VISION HEALTH*

Age-related Macular Degeneration (AMD) is a natural process with ageing but gets accelerated due to poor diet, smoking, hereditary reasons, UV rays, stress, working conditions and other lifestyle factors. AMD progressively affects the macula which is located in the center of the retina, responsible for central vision and high visual acuity. Poor macular health can cause oxidative stress within the retina, leading to vision related challenges.

It has been studied that Lutein (an important nutrient from carotenoid family) is one of the primary constituent of the macular region of the retina where it serves to provide anti-oxidant protection. People with AMD have been found to have low macular lutein density and therefore diet with lutein can be helpful. Research shows that 10 mg per day of lutein may help to replenish lutein concentration in macula and may support eye function and normal vision health secondary to MD.

Nutrilite Bilberry with Lutein formula contains a blend of lutein, extracts of bilberry and black currant. These ingredients together can support eye health and function. It contains lutein at a level that, as per research, helps support and replenish antioxidant levels in your healthy retinas and macula. Lutein in this formula is obtained from marigolds which is one of the nature's richest sources.

NUTRILITE® bilberry with lutein

FEATURES

- 1 Lutein
- 2 Bilberry Extract
- 3 Vitamin A
- 4 Spinach concentrates

BENEFITS

- Provides antioxidant protection for the retina
- Supports healthy vision health
- Provides anthocyanosides and black currants that are important for eye health
- This helps maintain good eyesight at night. Also, helps maintain good health of skin and mucous membranes
- Phytonutrients from this concentrate provide additional nutritional benefits

Use this dietary supplement for antioxidant support for your eyes

- Anyone who wants to supplement their regular diet with benefits of this product

SUGGESTED USE

- Take 2 tablets once daily with meals

A MIX OF
CAROTENOIDS
 RICH IN
VITAMIN A

Free radicals originate in bodily processes and are also a result of exposure to things such as air pollution, ultra violet rays, junk food, smoke, chemicals and stress and have the potential to cause serious cellular damage. The good news is that their effect can be minimized by antioxidants.

Carotenoids are currently being studied for their beneficial effects on human health, particularly for their rich antioxidant properties. Most researchers believe that a mixture of natural carotenoids offer the varied health benefit, and is found naturally in carotenoid containing fruits & vegetables mainly yellow, orange and green. The spectrum of natural carotenoids provides a wider range of antioxidant support to the body. Many of these antioxidants work in synergy. Beta carotene, a vitamin A precursor, is one of the most studied carotenoids and is a potent antioxidant. It yields high amount of vitamin A and is a safe source because it is converted to vitamin A as required by the body. Vitamin A is a nutrient that promotes growth and repair of body tissues, bone formation, healthy skin, hair and eyes.

Nutrilite Multi Carotene is a fat-soluble blend that contains all-natural carotenoid compounds from three concentrates: dunaliella salina algae, tomato and marigold flowers. It's much more like the mix of carotenoids found in fruits and vegetables. This product can provide you with the mix of carotenoid. Their ingredients can support skin, eye & immunity health and provide wide range of antioxidant support. Antioxidants such as vitamin A, C & E together make a great combination to neutralize the free radicals.

NUTRILITE®
 multi carotene

FEATURES

- 1 Beta Carotene (From Dunaliella salina algae)
- 2 Lycopene (from tomato extracts)
- 3 Lutein (from marigold flowers)

BENEFITS

- It is a natural source of beta carotene which is a vitamin A precursor. Vitamin A promotes growth and repair of body tissues, healthy skin, hair and eyes. Beta carotene supports counteract damage from free radicals
- Exhibits antioxidant activity
- Provides antioxidant protection to retina

ALL GREAT STRUCTURES START WITH A STRONG FOUNDATION

Tasty Blend of
Natural Orange, Vanilla,
Licorice Flavours

Feeding children today means feeding generations for a brighter tomorrow. Today's children will become tomorrow's citizens, workers and parents. When we invest wisely in children, the next generation will pay that back through a lifetime of productivity and responsible citizenship. When we fail to provide children with what they need to build a strong foundation for productive lives, we put our future prosperity and security at risk.

We all know making children consume pulses, green, leafy vegetables, fruits, milk and milk products is a tough task as they are fussy eaters. Hence, as parents, we need to make choices that help our kids have an additional support of vitamins and minerals needed for optimal growth along with a regular diet. World across, there is a focus on child nutrition and reputed journals and studies recommend multivitamin and multimineral supplementation for kids.

Nutrilite Kids Chewables provide a range of vitamins and minerals. No artificial colours, flavours or preservatives added. Nutrilite Kids Chewables may help you to provide support to meet multivitamin-mineral requirement of your kids.

KIDS WILL BE KIDS, ALL THE BETTER REASON TO HELP THEM WITH PROPER NUTRITION TO SUPPORT THEIR NEEDS

Delicious Natural
Cocoa Flavour

Calcium is one of the most important mineral in human body as it helps build strong bones and teeth. As parents, we know early years are most important in child development. Almost half of our skeleton framework is built during adolescent stage, so make sure kids get adequate calcium in their diet.

India ranks No. 1 in the world with 48% of our children being stunted as per UNICEF report. Nutrilite Kids Chewable Calcium and Magnesium Cocoa contains 270 mg of calcium and 50 mg of magnesium. Magnesium contributes to normal muscle and nerve function. No artificial colours, flavours or preservatives added.

NUTRILITE®
kids calcium
magnesium cocoa

FEATURES & BENEFITS

- Together calcium and magnesium help build bones and teeth
- Comes in a chewable format
- Convenient and easy for kids to chew
- Comes with tasty natural cocoa flavour, contains no artificial colours, flavours or preservatives

AN EDGE OF IRON SUPPLEMENTATION FOR KIDS

Delicious Natural
Raspberry-Cherry
Flavour

Iron is an important micronutrient for human body. Iron forms an important part of hemoglobin in blood, which is needed for oxygen transportation across human body.

It is sad but important to know that 70% of pre-school aged children in India suffer from iron deficiency called anaemia, as per UNICEF report on improving child nutrition. As parents, we realize the importance of green, leafy vegetables in our kids' diet, but most of the time we fail in our attempts to ensure they eat them.

Hence, iron supplementation becomes very important to support a regular diet for our kids. Nutrilite Kids Chewable Iron provides 6 mg of iron from ferrous fumarate, an iron source which is readily absorbed by body. It is natural raspberry flavoured with no added artificial colours, flavours or preservatives. Thus nurturing your young ones.

NUTRILITE®
Kids chewable iron

FEATURES & BENEFITS

- Contains 6 mg of Iron
- Iron helps in oxygen transportation in body, required for production and release of energy
- Contains ferrous fumarate, which is easily absorbed by the body
- Comes in a chewable format
- Convenient and easy for kids to chew
- Comes with tasty natural raspberry cherry flavour, with the goodness of all natural flavour.
- Contains no artificial colours, flavours or preservatives

Net Content: 100 N (Tablets)

NOT FOR MEDICINAL USE. NOT A SUBSTITUTE FOR A VARIED BALANCED DIET. NOT TO EXCEED RECOMMENDED DAILY USAGE. FOR FURTHER DETAILS, PLEASE REFER THE PRODUCT LABEL.

HELPS YOUR CHILD MAINTAIN NORMAL BRAIN FUNCTION

DHA Yummies in a tangy orange and citrus lemon flavour

Most people think they are giving their children enough nutrition to bring about proper brain and body development. But, are they consuming enough of Omega-3 fatty acids? The brain is predominantly made of fat, almost all of its structures and functions have a crucial dependency upon Essential Fatty Acids (EFAs), which we get directly from our food. The EFAs, particularly the Omega-3 fatty acids, are important for brain function and development during both the fetal and postnatal period. Docosahexaenoic Acid (DHA) is the predominant structural fatty acid in the central nervous system and retina and its availability is important for brain development, function and normal vision.

THE SOURCES OF OMEGA-3

The rich dietary sources of Omega-3 fatty acids are vegetable oils like flaxseeds or canola oil, peanut oil, walnut oil, green leafy vegetables, oily cold-water fish (mackerel, sardine, and anchovy etc.) and fish oil. It is from these Essential Fatty Acids that our bodies make the vital brain-fats and the vital messengers that help regulate a vast array of body activity¹. In India, the daily diet of children may fall short of Omega-3 fatty acids² (DHA*). Fish oil supplements then maybe the choice for the moms around the world when it comes to bridging the Omega-3 gap.

¹Chia-Yu Chang¹, 2, Der-Shin Kei¹, and Jen-Yin Chen³, Essential Fatty Acids and Human Brain, Acta Neurol Taiwan 2009;18:231-241

²Michael J. Weiser¹*, Christopher M. Butt¹ and M. Hasan Mohajeri², Docosahexaenoic Acid and Cognition throughout the Lifespan, Nutrients 2016, 8, 99; doi:10.3390/nu8020099

NUTRILITE® DHA yummies

FEATURES

What if fish oil supplements were made available in a format which children will love? Well, they are now. Designed just to make ingestion of Omega-3 fatty acids child's play, Nutrilite brings to you Nutrilite DHA Yummies Omega-3 Soft Drops, in tangy orange and citrus lemon flavour. The kid-friendly, chewable format coupled with their favourite flavour is sure to have your child asking for more. But then, DHA Yummies does not only contain Omega-3 fatty acids DHA* & EPA**, it also has the much required Vitamin D which is needed for normal growth and development of bone and contributes to the normal function of the immune system in children. Thus, Nutrilite DHA Yummies helps your child get multiple benefits in each drop.

BENEFITS

- DHA contributes to the maintenance of normal brain function
- Contains Vitamin D which facilitates growth & development of bones, and normal functioning of immune system
- Kid-friendly chewable format
- Tangy orange and citrus lemon flavour
- Just one soft drop, one time a day

BEST OF INDIAN TRADITIONAL WISDOM

Our centuries-old good health practices used a holistic approach to maintain the right balance between our body and mind. Carrying forward Carl's philosophy and keeping up with Nutrilite's commitment to provide you with the best, we bring you traditional wisdom with the goodness of eternal nature and wonders of science. The new Nutrilite Traditional Herbs range brings together the Best of Nature, Best of Science and Best of Traditional Wisdom.

A 3-STEP PRINCIPLE FOR THE BEST QUALITY OF HERBS

A rich history of traditional herb based remedies is documented in ancient Indian literature. There are many products in the market trying to imbibe these. But when you go to the market to buy such products, you are still wondering -

**Are the included herbs Pure? Are they Safe?
Even if they are Pure & Safe will they work efficaciously?**

But for Nutrilite, it has always been about Purity of the herb, Safety & Potency.

'YOUR TRUST IS OF PARAMOUNT IMPORTANCE TO US'

We, at Nutrilite, are constantly working and cut no corners in enhancing and developing the Nutrilite brand and quality of our products. We meet the standards of highest levels of quality and work ethics. Our products meet **national standards for safe levels of pesticides and heavy metals.**

We endeavor to bring to you an extract of the herbs from the **best of the organic farms.** These are high quality products that are prepared using traditional experience and knowledge supplemented with new and innovative tools. The **richness and purity of herbs** set our products apart for delivering **assured levels of potency.**

1 Amalaki, Vibhitaki & Haritaki Tablet
= 3 gm of raw Amalaki, Vibhitaki & Haritaki herbs

Modernization and urbanization have undoubtedly eased your lives in many ways. However, the hectic and stressful lifestyle has taken its toll on your health and body systems. Erratic eating habits, frequent consumption of junk food, along with impure, adulterated and worsened quality of food, all have contributed to an unhealthy life. Such a situation creates frequent problems in your gut.

FEATURES & BENEFITS

The blend of these three herbal extracts is known to help# in:

- Supporting digestion
- Having laxative properties
- Improving appetite
- Supporting colon health
- Soothing hyperacidity
- Detoxifying the body systems

SUGGESTED USE

- As the concentration of active ingredients is high in every tablet, just 1-2 tablets a day is more than sufficient. Best if consumed with lukewarm water

NUTRILITE® amalaki, vibhitaki and haritaki

Net Content: 60 N (Tablets)

Health is affected by both internal and external factors. They disturb the natural equilibrium of your body, thus, manifesting an illness. Modern age, fast-forwarded hectic lifestyle, unhealthy eating habits and constant stress have become a part of your daily routine. All of this coupled with work pressure and anxiety leave you exhausted.

FEATURES & BENEFITS

Being a rejuvenator, Ashwagandha is known to help# in:

- Supporting vitality
